Litton Systems, Inc., Advanced Circuitry Division, Springfield, Missouri
(EPA I.D. No. MOD007152903)

Robert L. Morby, Chief, ARWM/WMBR

Michael Sanderson, Chief, ARWM/AWCM

As you are aware, we have issued an emergency permit for removal and land treatment of wastewater in the storage surface impoundment at this facility. We also understand that the height of the surface impoundment dike was raised by three feet. A revised Part A reflecting this increase in capacity has not been received for our review.

We request that your staff advise us by April 16, 1982, what compliance action can be taken in this case. We are currently reviewing a closure plan for this facility, but a final date for closure has not been established.
